## Art Rejections:

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 2. Claims 1-9, 15, 18, 21-30, 36 and 39-40 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by <u>Bodin</u>, U.S. pat. No. 6,311,223.

<u>Bodin</u> discloses a method of transmitting HTML documents over the Internet comprising:

a) parsing the document to recognize markup tags in the document (see col 5, lines 53-62),

Art Unit: 2154

- b) using a lookup table to convert the tags into tokens and to create a token stream, i.e., tokenized document (see col 5, line 61 - col 6, line 31),
- c) compressing the tokenized document (col 6, lines 32-35),
- d) decompressing the compressed tokenized document (col 6, lines 44-46),
- e) recreating the markup tags from the tokenized document (see col 6, lines 47-55).
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2154

5. Claims 10-14, 16-17, 19-20, 31-35, 37-38 and 41-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bodin.

Per claims 10-14 and 31-35, <u>Bodin's</u> teachings are still applied as discussed above. <u>Bodin</u> does not explicitly teach using specific compression technique including Huffman and LZW variety. An official notice is taken that Huffman and LZW are well known data compression techniques in the art.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize any conventional data compression technique including Huffman and LZW variety in <u>Bodin</u> because it would have enabled practicing <u>Bodin</u>'s invention (see col 6, lines 32-34).

Per claims 16-17, 19-20, 37-38 and 41-42, it would have been further obvious to one skilled in the art to perform the data compression/decompression steps at the hardware level, i.e., network interface or at the application level, i.e., web browser.

## Conclusion:

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Vu whose telephone number is 703-305-9597. The examiner can normally be reached on Monday through Thursday from 8:00am to 4:00pm.

Art Unit: 2154

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee, can be reached on (703) 305-8498.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is 703-305-9600. The Group fax number is 703-872-9306.
